EDUCATION

Indian Institute of Technology (ISM) Dhanbad
Master of Technology (M.Tech), Computer Science and Engineering
Cumulative CGPA: **7.92** (10-point scale)

Dhanbad, Jharkhand
July 2026 - May 2026

EXPERIENCE

AI/ML Engineer

Jun 2026 - Present

Secninjaz Technologies LLP

New Delhi

- Lead a **team of 5** to assess opportunities in the drone industry, delivering multiple solution proposals that expanded the organization's addressable market.
- Engineer end-to-end LLM solutions on on-premise **NVIDIA H200** GPU infrastructure, authoring a local LLM deployment proposal submitted to the state government.
- Work with the core AI team on an in-progress initiative to transition the organization to an AI-native organization.

AI/ML Intern

Mar 2026 - Jun 2026

Secninjaz Technologies LLP

New Delhi

- Partnered with cross-functional teams to deliver AI/ML integrations across multiple proof-of-concept (POC) initiatives, translating business requirements into deployable technical solutions.
- Evaluated federated learning as an emerging capability and presented its commercial viability to the internal business committee, identifying new revenue opportunities in privacy-preserving AI.
- Competed in the CDSCO-IndiaAI Health Innovation Acceleration Hackathon, independently designing and submitting a complete end-to-end solution as a sole-member team.

Vice President

Feb. 2024 - Feb. 2025

CSES IIT (ISM) Dhanbad

IIT (ISM) Dhanbad

- Spearheaded operations, logistics, and resource allocation for **7+** flagship departmental events (including Yaadein'25, Udbhav'25, and Agglomeration 2.0), executing workflow frameworks that scaled attendance to over **500+** participants.
- Optimized stakeholder relations and event coordination protocols by managing high-profile dignitaries, standardizing comprehensive operational rosters, and delivering key formal addresses to institutional leadership.

SKILLS

Programming Languages: Python, C++, SQL, C.

AI / NLP / GenAI: RAG, Prompt Engineering, LLM Pipelines, Hugging Face Transformers, LangChain, Agentic AI

Backend & APIs: FastAPI, REST APIs, Docker, Git, Linux.

Databases / Retrieval: PostgreSQL, FAISS, Vector Databases, Hybrid Search, Reranking.

PROJECTS

HomeoBuddy : RAG Powered Chatbot

Python, Langchain, RAG, NLP, LLama 2.7B, Mistral 7B

- Developed an Llama-2 chatbot using LLM & RAG pipelines in python, generating structured, 100% symptom based homeopathy recommendations. Integrated GPT-3.5 for automated assessments, cutting grading time by **70%**.
- Built an evaluation system leveraging GPT-3.5 and NLP, using advanced prompting techniques and embeddings to improve accuracy by **82.3%**. Blended LLama 2.7B for chat assistance and Mistral 7B for Chat PDF functionality.

MasterPlay : AI Research Agent (RAG + Agentic Workflow)

Python, ChromaDB, RAG, LLM.

- Developed a stateful RAG agent using Python and ChromaDB, generating structured, 100% factual video game reports. Integrated Tavily API for automated web search fallbacks, expanding query coverage by **55%**.
- Built an evaluation system leveraging state machines and confidence scoring, using semantic search to improve retrieval accuracy by **28%**. Managed multi-turn session context, boosting structured JSON output efficiency by **40%**.

ACHIEVEMENTS

- Achieved **96 Percentile** in GATE CS 2024 among **150K+** candidates (top **4%**).
- Secured **AIR 2** in SRMC'2025 (Round 1), organised by IIT Madras & IIT Bombay.
- Secured **1st place** in problem statement (**5th/77** overall) at Agglomeration 1.0, IIT (ISM) Dhanbad.
